

Dear Valued Client:

The continually fluctuating cost of fuel in the Phoenix Metro area has forced us to institute a temporary fuel surcharge to all deliveries. The surcharge does vary in cost depending on the price of gas, and those costs are outlined below. Flash Delivery has not increased rates in several years and has been able to successfully sustain it's business providing the finest and most efficient delivery service possible without passing on rising fuel costs to it's customers.

The surcharge will add 5% to all deliveries while the local average for regular unleaded is between \$2.00 and \$3.00 per gallon, 10% between \$3.01 and \$4.00per gallon, and 15% above \$4.00 per gallon. Please note, there will be no surcharges applied while gas is below \$2.00 per gallon. We will be continually monitoring fuel prices at www.phoenixgasprices.com and www.aaa.com and will be adjusting the surcharge as necessary based upon live conditions and reports.

Thank you for your continued business and support,
